

BUILD RAPIDLY. TRANSFORM DIGITALLY.

The Fastest Low-Code Application Development
Platform for Digital Innovation

Democratize Application Development, Unleash Innovation

With humble beginnings in 2015 as a pursuit by a few passionate, talented and self-driven individuals, Neutrinos has dramatically progressed to a forerunner in digital innovations. Presently 120+ employees strong with 100+ years of collective industry experience, Neutrinos is rapidly growing and has its presence across South Africa, South East Asia, India & USA.

A LOOK INTO THE PLATFORM

Neutrinos is a Low-Code High Productivity Application Platform-as-a-Service (hpaPaaS) for enterprises to Innovate and build unified, omni channel solutions, rapidly. Our innovative solutions enable enterprises to embark on the digital transformation journey by adapting to the latest technologies and embracing RPA, AI, Mobile, Web, Machine Learning, Big Data, BPM, IoT and Social Media Integration.

Pillars of Neutrinos

Studio

An IDE for developing apps that contain a base workspace and an extensive plug-in/widget system for customization. The drag-and-drop feature makes app development quick and easy.

Art

Once the application is built using Modelr, it is hosted on Neutrinos Art, the API run time engine which contains all the REST Services (CRUD DB Operation), Rendition Engine for all UI, Smart Libraries, and a set of APIs.

IDS

LDAP Compliant, Neutrinos IDS uses the OAuth 2.0 protocol, providing user authentication and single sign-on functionality. It also grants user tokens to control authorization and authentication.

Store

The marketplace of Neutrinos is a self-service centre with pre-built, reusable and standardized digital assets like widgets, micro services, SmartApp templates and, pre-defined data models.

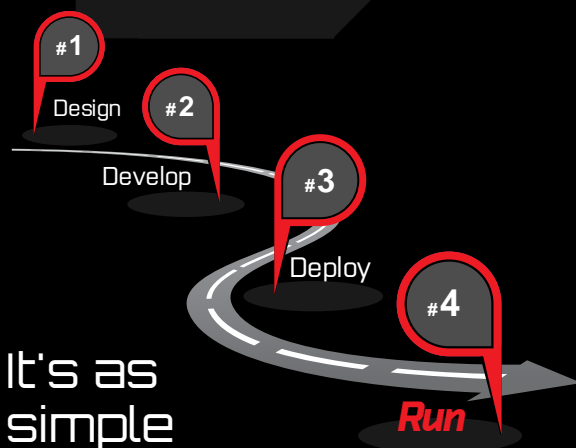

Modelr

Allows developers to visually model their services, providing 2000+ widgets to external systems as well as connectivity to IoT devices.

Console

With the console, Deployment is seamless with "1 Click Deployment" to GCP for Web, Android, IOS and other platforms.

Platform Architecture

It's as simple as it looks.

IDE and Service Integrator with Drag-and-Drop

1-Click, Cloud agnostic deployment and Migration

Identity Management as a Service (IDaaS)

Serverless Computing for simplified code deployment

WHAT YOU CAN DO WITH NEUTRINOS

Building enterprise grade Web and Mobile applications takes time, technique and a team of skilled programmers. The Neutrinos RAD Platform makes building these applications as easy as point-and-click to build complex applications.

Ideate Solutions

Use modeling tools to visualize and prototype new applications

Build Rapidly

Accelerate and simplify the app development process

Transform Digitally

Provide hassle-free and rich digital experience for the end user

What Neutrinos Offers

Visual Modeling

Build complex UIs and prototypes with ease, using a simple drag-and-drop modeling interface

Remodeling

Iterate multiple times without expensive change requests and the need for data migration

Smart Libraries

Integrate with legacy applications and use predefined templates and themes to jump start applications

Native Capabilities

Add camera, signature, and geo-tagging capabilities to applications with ease

App Lifecycle Management

Design, develop, test, deploy, analyse, and manage applications seamlessly

Cloud First

Build enterprise-class, cloud-ready apps using the cloud-first design and architecture approach

Security

Deliver secure data flows with the granular and multi-layer security framework and track down security threats with effective audits

Internet of Things

Multiple connectivity protocols, end-to-end security models, support for multiple gateway devices, data analytics, machine learning and visualizing techniques

Cognitive & Real time analytics

Integrate with IBM Watson and Microsoft Azure ML among others to build cognitive learning capabilities. Integrate multi-data streams from IoT - enabled devices, apps and websites to deliver real-time analytics

NEUTRINOS WORKS WITH

A robust platform that is built on easily available technologies such as HTML, CSS, Javascript & MEAN Stack. The Platform offers seamless integration capabilities across thousands of widgets, micro-services, back-end services and connectors allowing users to build fully integrated and high performance solutions.

Few of the many thousand integrations that are possible include,

THE NEUTRINOS EDGE

Affordable Pricing

Access to unlimited widgets and apps for subscribed Enterprises. Flexible licensing options and competitive pricing for Partners.

Nimble Infrastructure

Open Source software and low footprint hardware that can be sized based on volume.

Plug & Play Model

One-time development which can be deployed across multiple channels with a single codebase.

No Lock-in

Applications built independently can be integrated with existing ecosystem / cloud platform.

Platform Agnostic

Existing investments can be leveraged by using what is built with any DB, ECM, BPM, ESB engine and AI Service.

Disruptive Edge

Built-in capabilities for futuristic tech like IoT, AI, RPA, etc.

OTHER TRAVELLERS ON THE DIGITAL TRANSFORMATION JOURNEY SPEAK

The old Platform we used was inflexible, unwieldy, we couldn't get to the code, we didn't get any training...long story short, we replaced [the old system] with Neutrinos at a fraction of the cost of the old system. Over the last 14 months, we developed six systems on Neutrinos – one of which delivered ROI in just four months – An Absolutely Spectacular Result!

— **Yusuf Jardien**
Group CIO,
Telesure Investment Holdings

Tanishq GHS App is the first customer-facing app in Titan Jewellery. More than 8 lakh transactions has been done, the app contributes more than 20-25% of our jewelry business. When we launched the contribution of app payments was only 10-15% but now it has crossed more than 50% of overall online payment. We are very happy to be associated with Neutrinos!

— **Prem Kumar**
Delivery Manager,
Tanishq (India)

"Neutrinos is helping us in our Digital Transformation program. We have just started the journey but looking at the team I feel pretty confident that you can deliver. I wish the team to continue working on the new technologies creating something which is adding value to the customers – Well done, till now I am very happy!"

— **Vikas Sinha**
Regional Lead Operations Performance,
MPI Generali, Asia
