

## Assessment 2a:

Develop an Angular CRUD Application for adding, deleting and updating Product and Product Details using Angular, Angular Material and Angular Flex front end. Screenshots are provided for your reference. But you can be as creative as possible in displaying the dashboard of Products. For Database kindly use localstorage. Bonus - Integration of back end of MongoDB.

### 1. Product screen (dashboard)

### 2. Add Product page (mat-error is required) price field should allow only numbers.

3. **Product screen (dashboard)** show the data that you insert in the add product. It looks below to insert the snap.

Products		+
Product Name	Product Price	
Bubble Wrap	\$ 3000	

4. **Click the row** it redirects to the product-details page.

Product Price:  
Updated At:

5. **Click update** it redirects to update Screen and the update screen contains the value to be updated.

Product Name

Product Desc

Product Price

**6. Delete screen it deletes the data from Db.**

Products		+
Product Name	Product Price	

## Assessment 2b:

Develop an Angular CRUD Application to add, delete and update user details.  
Following screenshots help you giving some guidelines for user details.

### 1. Login Page

### Login

FirstName

FirstName

LastName

LastName

Password \*

Enter Password

Email \*

Email

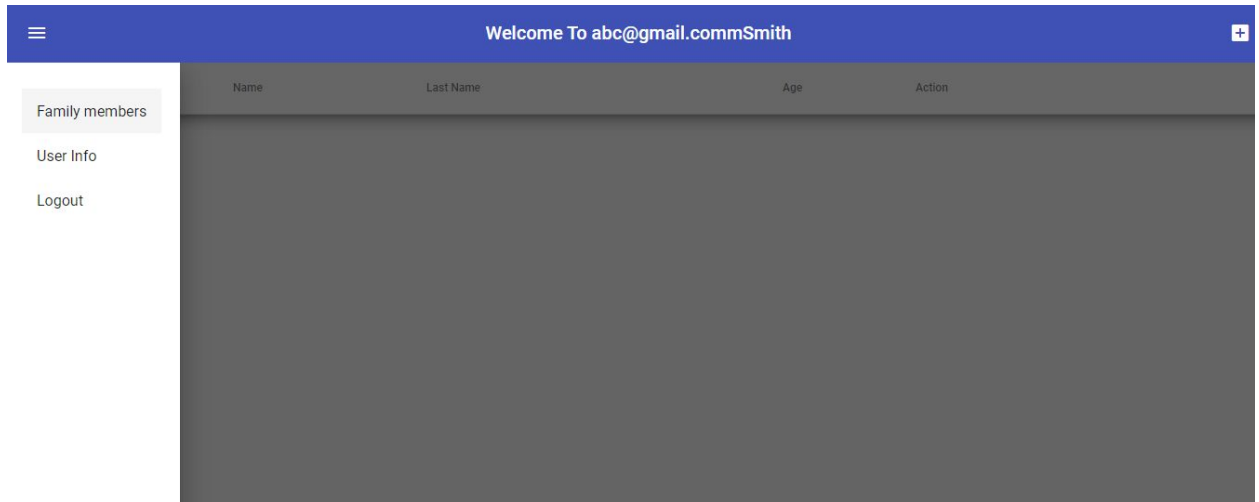

Choose a date

Sign In

### 2. Dashboard Page without side nav

Welcome To abc@gmail.commSmith				
ID.	Name	Last Name	Age	Action

3. Click menu It opens the side nav panel.

4. Click Add button Addmember page open.

The screenshot shows the "Add Members" form in a web application. The header bar is blue with a hamburger menu icon, the text "Welcome To abc@gmail.comAbc", and a plus icon. The form is divided into two sections, each titled "Add Members". The first section contains the following fields: "FirstName" (with a "👤" icon and "Alphanumeric only" text below it), "lastName" (with a "👤" icon and "Alphanumeric only" text below it), "Age", "MobileNumber", "Email", and a gender selection with radio buttons for "Male" and "FeMale". The second section is partially visible and contains "FirstName" and "lastName" fields.

5. Once Click Submit button it redirects to dashboard with respective data you entered in add member page.

Welcome To abc@gmail.comAbc				
ID.	Name	Last Name	Age	Action
0	john	A	23	Edit   Delete
1	William	S	43	Edit   Delete

6. Click Edit button

Welcome To abc@gmail.comAbc

ID.	Name	Last Name	Age	Action
0	john	A	23	Edit   Delete
1	William	S	43	Edit   Delete

Row Action :: Update

Update Name

Update

Cancel

7. Click the Delete button.

Welcome To abc@gmail.comAbc

ID.	Name	Last Name	Age	Action
0	john	A	23	Edit   Delete
1	William	S	43	Edit   Delete

Row Action :: Delete

Sure to delete ?
